

# Kaua'i Mongoose Monitor

[www.kauaiisc.org/mongoose](http://www.kauaiisc.org/mongoose)

**November 2013**

## Pretty quiet on the Western Front...

Trapping for mongooses continued on Kaua'i during November at three sites: Moloa'a (Pila'a Bay), Po'ipū Bay Golf Course, and in Kalaheo on private property with a total of 95 traps deployed and 174 person hours expended. No mongoose captures were recorded.

There were only three reported observations during November: two by the same person in Kalaheo, and one by a woman who saw one a year ago, but wanted to report it.

## November 2013 Mongoose Sightings

- **November 1** - Kalaheo. 1st of two mongoose seen on observer's property (see below) near the top of his goat pasture. (*Questionable*)
- **November 5** - Omao. Observer actually saw the animal September of 2012. She was walking her dog on a cane road and the animal ran in front of her. (*Credible*)
- **November 8** - Kalaheo. 2nd sighting of mongoose on observer's property. This one seemed a bit bigger than the first one. (*Credible*)
